

# Tirzepatide

## The **SCIENCE** & **RESULTS**

The "Dual-Peptide" Breakthrough

### Why It Is Different

Tirzepatide is the **most advanced weight loss medication** because it is a Dual-Peptide. While older medications only use one pathway, Tirzepatide uses two:

**GLP-1**

Regulates **hunger** and **blood sugar**.

**GIP**

Targets how your body **breaks down fat** and helps **minimize side effects**.

## The Results

Because it targets TWO pathways, it is more potent and often results in higher weight loss percentages than single-peptide treatments.

### The "Power of Three" Goals

We monitor your progress to ensure the medicine is doing three things:

#### **STOP CRAVINGS**

**No more "food noise"** or constant thinking about snacks.

#### **FULLER FASTER**

**You feel satisfied** after much smaller portions.

#### **FULLER LONGER**

**You stay satisfied** for hours after a meal.

### The 1-2 lb Rule

**Everyone starts at 2.5mg for 4 week.**

Our goal is for you to lose 1 to 2 lbs per week. If you are hitting that goal, we stay on that dose. We only move up when your body tells us it's time.

# Tirzepatide

## All Inclusive Programs

Everything you need for success is included in your **4-week cycle**.

### Whats included:

### Medication

Your specific Tirzepatide dose & supplies.
